[Re: test](#)

Oh oh~~

The same problem has occurred. This time I notice the error page, the given error code is the following:

tag\_122: ERROR: relation "tag\_122" does not exist

Here's the procedure:

1. Tag created
2. Tag relocated
3. Mepopage edited
4. Mepopage revised
5. Phorum message posted
6. Error occurrence

[Re: test](#)

For these two times, as I posted the "reply message," the error page occurred, and show the info:

tag\_122:

[Re: test](#)

Another notice,  
when deliver the revised message posting, there's no error page.

I think I (or we) have to perform a major operation for the part of association for tagging.
