[如何禁止從遠端\(SSH\)以ROOT登入：修改 /etc/ssh/sshd_config](#)

1. 找到檔案 /etc/ssh/sshd_config

2. 修改其中的

```
#PermitRootLogin yes
```

改為

```
PermitRootLogin no (注意開頭不要有井字號 #)
```

3. 重新啟動 SSH

```
/etc/rc.d/sshd restart
```

或者

```
rcsshd restart
```

Reference:

1. How do I disable remote SSH login as root from a server?
