[Some notes about linux administration \(SUSE\)](#)

Two ways to create a symbolic link (from link-to-file1 to file1):

1. `ln -s file1 link-to-file1`
2. `cp -s file1 link-to-file1`

The configuration files of syslog-ng:

1. `/etc/sysconfig/syslog`
 2. `/etc/syslog-ng/syslog-ng.conf`
 3. `/etc/syslog-ng/syslog-ng.conf.in`
-
