[NanoTech][Memory] Taiwan Innovates Globally Smallest 9nm Functional Resistive Memory with Lowest Programming-current

[NanoTech][Memory] Taiwan Innovates Globally Smallest 9nm Functional Resistive Memory with Lowest Programming-current (Chinese Version)

RTI (2010/12/14), udn.com, &The Liberty Times (2010/12/15) National Nano Device Laboratories (NDL), Taiwan, innovates the globally first smallest 9nm functional resistive memory cell with the lowest programming-current (
