[Invention] Taiwan Won 28 Gold Medals in International Exhibition of Inventions of Geneva

[Invention] Taiwan Won 28 Gold Medals in International Exhibition of Inventions of Geneva (Chinese Version)

CNA News & udn.com (2010/04/24) International Exhibition of Inventions of Geneva took place from April 21 to 25. This year, 54 people from Taiwan with 63 pieces of inventions took part in the event and brought back 28 gold medals, 21 silver medals and 10 bronze medals.

Among these medals, Technology and Science Institute of Nothern Taiwan (TSINT) obtained three gold medals, six silver medals and four bronze medals. Remarkably, Professor Yen-Hsin CHAI of the Department of Electrical Engineering, TSINT, and his students obtained two gold medals with their "energy saving night lamp" and "multi-functional skylight" (trans. temp.). The energy saving night lamp enables the users to adjust the luminance by clapping hands. Besides, a 200KHz insect repellent and a low frequency sleeping-aid are attached to the lamp. The multi-functional skylight, beside of being the usual ventilation skylight, can also be totally pushed outwards or taken down inwards easily, becoming the escape hatch. Each of both inventions won them a gold medal.

Other awarded inventions from Taiwan include, for instance, a multi-functional folding bike which can become a shopping cart; the massage vest and pants can massage when worn; a "Brain Cooler" (trans. temp.) which can not only train your concentration but also tranquilize your mood. Kun Shan University's self-stop clothes dryer, which detects the temperature of the exhaust to determine whether the clothes are dry and, if so, to self-stop accordingly, drew a lot of attention in the exhibition.
