#### Why Generate Simoleons and Lifestyle points??

The Sims FreePlay is a freemium mobile platform game developed by Electronic Arts which uses simoleons and lifestyle points as in-game currencies. Simoleons are used as basic money earned from planting, working, completing tasks and so on. Simoleons can be used to purchase various decorations, working buildings, houses, etc whereas lifestyle points can be used to purchase unique houses such as designer house and can be used to instantly finish up tasks, buildings etc. Though the game is very fun and addictive things take too long to finish which urges us to use lifestyle points. Some buildings are way too expensive and earning simoleons for it can be difficult. Spending real money on the game is not a real option for all of out there so use our generator to get unlimited simoleons and lifestyle points without spending real money on the game and build a wonderful city without worrying about simoleons and lifestyle points.
