[Cloud Computing] NCHC Establishes a Cloud Computing Technologies and Applications Development Alliance
[Cloud Computing] NCHC Establishes a Cloud Computing Technologies and Applications Development Alliance
(Chinese Version)

NCHC News (2010/07/02) The Alliance of Cloud Computing Technologies and Applications (ACCTA), as established by the National Center for High-Performance Computing (NCHC), was formally recognized on August 1, 2010. The alliance invites all interested parties to join in this endeavor.

This alliance is expected to provide an outstanding exchange platform for cloud computing technologies and applications development in the Asia Pacific Region and beyond. Through discussion and exchange on cloud computing infrastructure (IaaS), platforms (PaaS), and applications (SaaS), industry, government, and academia can fully exploit the use of cloud computing resources. By exchanging information and experience on cloud computing security, data centers, computer clustering, network architectures, and system integration, members will improve their international competitiveness. For details regarding activities of and membership in this alliance, please refer to the "Regulations for the Alliance of Cloud Computing Technologies and Applications."

Advantages of the NCHC's Cloud Computing Launch, please refer to NCHC's website:
